

Perhaps you are just beginning the search for the perfect school—a place that will best meet your child’s needs, while also offering a community that feels right for your family. We believe St. Peter in Chains may be that place. Read on to learn what other parents have to say:

PARENT TESTIMONIALS

“At St. Pete’s, they don’t just teach. They mold and they model. They focus on more than your grades—they focus on you as a person and on your character. And when you focus on that, you excel academically, because you have all those things to not worry about—that you’re loved and safe, and your friends are people you’ve been comfortable with for many years.

“We send them to private school because it’s the best money we can spend. What else is an investment like this? Where are you without the best foundation, faith, and education in one place? It’s the best money we’ve ever spent. When you have great kids, you’ve done right.”

- Katie Crank, parent

“We looked at five other schools in the area, and St. Pete’s was the one that really felt like home. We loved the sense of community. And as an educator myself, I’ve been very impressed with the solid academic foundation my girls are getting here at St. Pete’s. It’s convenient, too—just 15 minutes from our Liberty Township home.”

- Aileen Ernst, parent

“I feel a great sense of pride when I look at my kids and see how much they care about people. A lot of that foundation came from here at St. Pete’s.”

- Andy Schuster, parent

“My oldest son is a kindergartener here at St. Pete’s, and he’s excited to come to school every morning. He’s excited to do his work. And he seems really, really comfortable.”

- Matt Marcum, parent

“The education here is phenomenal, and it’s one that is rooted in the Catholic faith—in those same values we embrace at home. Praying every day. Being supportive of one another. Looking out for each other. The atmosphere at school is one of a family.”

- Colleen Schuster, parent

“My girls [in kindergarten, 2nd, and 4th grades] have really benefited from being in a smaller school environment. When our first one started, that really stood out. She was accepted right away and had a lot of friends right away. The other thing that really stands out for me is the sense of community. My 2nd grader knows all the kindergarteners *and* all the 8th graders, and everyone in between. It’s neat to be able to see your kids foster these types of relationships.”

- Ryan Ernst, parent
